

hyperGUM®

JELLY BEARS WITH THE METABOLIC TURBOCHARGER L-CARNITINE

- ENERGY FOR SPORTS ENTHUSIASTS
- GOOD FOR YOUR BODY AND YOUR SHAPE

hyperGUM jelly bears with L-Carnitine were especially developed to support a healthy, athletic and diet-conscious lifestyle. When it was introduced for the first time at the ISPO 2003, this product convinced the international sports audience of its benefit for all kinds of sports as an ideal nutrient and energy treat – therefore it received the **ispo DuPont BrandNewAward**.

THE FUNCTIONS OF HYPERGUM JELLY BEARS

■ L-Carnitine improves the overall performance

L-Carnitine is a vitamin-like substance. It strengthens important functions of the human body and plays a key role in the body's fat metabolism. L-Carnitine transports fatty acids to the cells' power stations (the mitochondria). During this process new energy is produced and the fat metabolism is regulated.

L-Carnitine enhances the function of the body's organs like the heart and liver, the muscles and the immune system. The results are for example a better performance of the muscles and fewer muscle pains.

hyperGUM jelly bears with L-Carnitine are good for the body and the shape. They are the perfect companion during a diet or a fitness and wellness program as they support the fat metabolism and are fat free.

L-Carnitine does not only speed up our fat metabolism but also our mental capacity. It improves the ability of the brain and the nerves. Therefore it helps relieving stress.

■ hyperGUM jelly bears strengthen bones and joints

High-quality gelatine supports bones and joints, reduces the risk of getting injured and provides important protein.

■ Energy for the organism during sports and fitness activities

L-Carnitine is a nutrient that has been tested during competitive sports activities. A great number of dissertations and long term studies document its efficiency and safeness. The athlete can perfectly regulate his body's energy budget by taking small doses of carbohydrate; he can prevent hypoglycemia and build up new energy.

Recommendations of athletes, product information and downloads (e.g. print data): www.hypergum.com

hypervital's fat-free **hyperGUM jelly bears** are colourful and very tasty and because of their contents of L-Carnitine they are good for the body's energy supply and the figure. Each jelly bear contains 10 mg of 100%-pure L-Carnitine (L-Carnipure from Lonza AG), is produced with highest quality ingredients and does not contain artificial colours.

hyperGUM jelly bears are not bulky and can revitalize athletes very rapidly.

hyperGUM jelly bears are available at sports outfitters, fitness studios, pharmacies (PZN 0668407) and via the internet www.hypergum.com.
